RIPE NETWORK COORDINATION CENTER

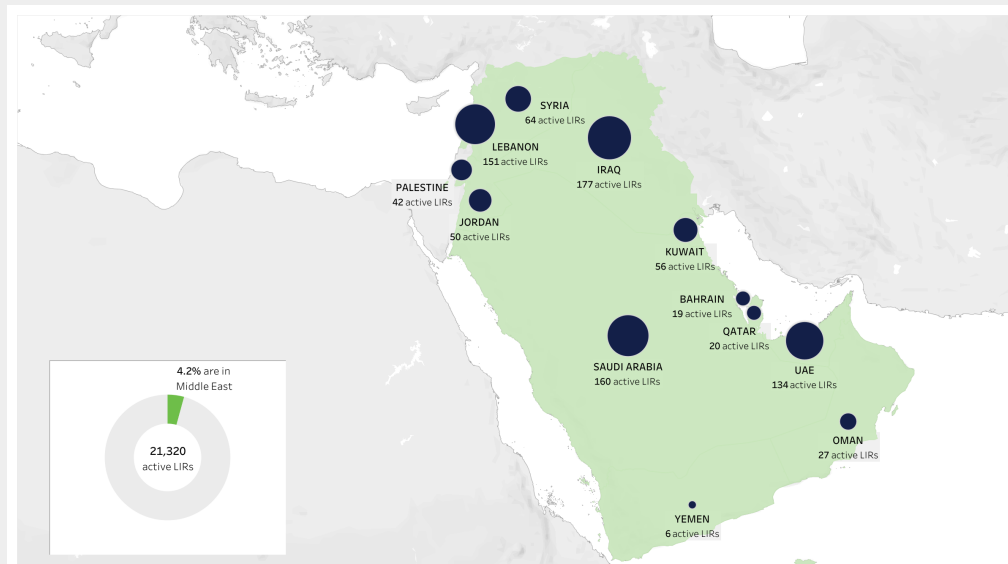

The RIPE NCC and The Arab Governments

A Successful Collaboration

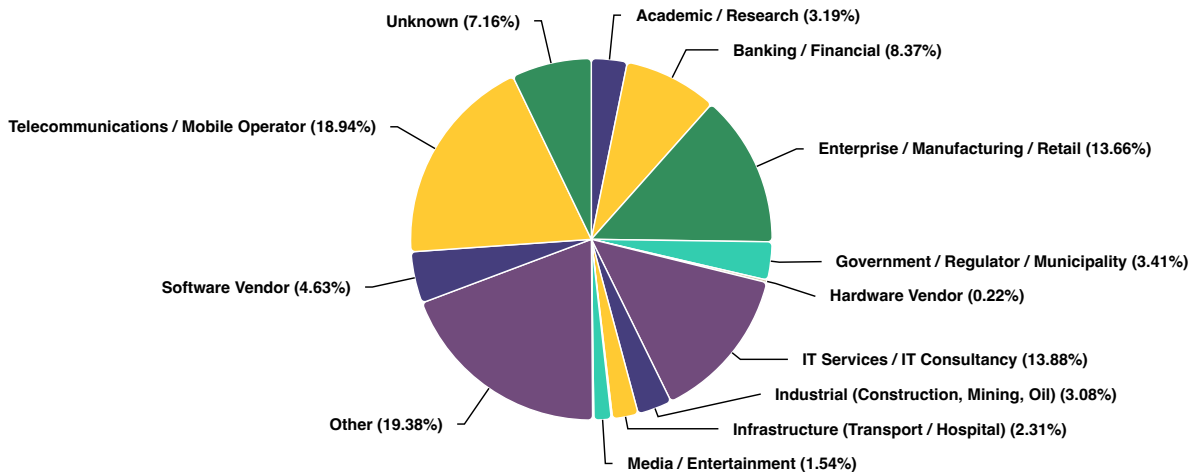

- The RIPE NCC operates in a diverse region that spans over 75 countries and has different political, regulatory, and cultural contexts.
- While Western Europe leans on bottom-up, community-driven governance, the Middle East and some other regions follow government-led, top-down approaches.
- Achieving our goals requires a tailored, respectful, and trust-based approach with the different stakeholders.
- The RIPE NCC adapts its engagement to foster meaningful collaboration with the different stakeholders, especially with governments in the Middle East region.

Bridging Governance Models, Building Trust

Membership Landscape: Governments Beyond a Single Category

In some parts of our service region, particularly in the Middle East, governments are not only regulators but also stakeholders or co-owners of major telecom operators and corporations

Governments and Regulators

The Successful Collaboration

Strategic Alignment in Action

Our work in the region is aligned with the RIPE NCC's strategic objectives

● Countries:

- United Arab Emirates
- Saudi Arabia
- Bahrain
- Jordan
- Qatar
- Lebanon
- Iraq
- Syria
- Yemen
- Oman

Takeaway ...

From Dialogue to Impact

- **A trusted relationship has been built between the RIPE NCC and Arab governments, leading to impactful outcomes:**
 - Enabled IPv6 and RPKI deployment.
 - Driven policy positioning on Internet governance and public policy.
 - Supported Internet development and connectivity
- **Strong coordination across different stakeholders reinforces regional priorities.**
- **Active collaboration across key platforms, including:**
 - National and regional initiatives (i.e Leb IGF, Arab IGF, SAMENA, and League of Arab States)
 - Global scene (i.e ITU events, WSIS+20, and the global IGF).
